EDUCATION

Northern Kentucky University, Highland Heights, KY

GPA: 3.985/4.0

*Bachelor of Science in Computer Information Technology – Cloud and Network Administration Track
Information Security Minor*

EXPERIENCE

IT Technician

Newport Aquarium | August 2025 – Present

- Provide on-site technical support in a high-availability, guest-facing environment, troubleshooting hardware, software, and network issues to maintain continuous operations.
- Maintain and troubleshoot operational systems including POS, ticketing, A/V, digital signage, and media systems.
- Deploy and configure workstations, ensuring proper system setup, user access, and readiness for production use.
- Manage user accounts, permissions, and access controls using Active Directory and Azure AD in alignment with security and access control best practices.
- Resolve network connectivity and secure access issues, including VPN access, endpoint communication, and internal network reliability.
- Document incidents, service requests, and resolutions using HALO ITSM to ensure efficient tracking and issue resolution.
- Utilize technologies including Cisco Meraki, Duo, Mimecast, Scalefusion, VMware vSphere, and BeyondTrust for system management, security, and remote access.
- Contributed to a network infrastructure redesign for life support systems, implementing segmentation and redundancy that improved reliability and resulted in approximately \$15,000 in cost savings.

Machine Learning Intern

DS Systems | July 2025 – September 2025

- Contributed to AI/ML projects supporting federal use cases including document validation, fraud detection, and workflow simulation.
- Supported development of workflows for document analysis, identifying inconsistencies and potential fraud indicators.
- Designed and implemented interactive dashboards using Streamlit to visualize model outputs and improve usability.
- Utilized Python for data preprocessing, analysis, and prototype development within machine learning workflows.
- Analyzed large-scale datasets to identify patterns and support predictive modeling efforts.
- Assisted in development of functional prototypes designed for scalable, secure deployment in government-oriented environments.

- Collaborated within a remote, cross-functional team to align development with technical and compliance requirements.

TECHNICAL SKILLS

Security and Networking: Cisco ASA (ACLs, NAT, VPNs), GRE/IPSec, DHCP Snooping, BPDU Guard, Port Security, Syslog, NTP

Systems and Administration: Active Directory, Azure AD, Microsoft 365, Exchange Admin Center, Windows Server, Linux

Cloud and Infrastructure: AWS (CLI, EC2, S3, VPC, Route 53), Docker, VMware vSphere, Cisco Meraki

Security Tools and Access: Duo Admin, Mimecast, Tenable.sc, BeyondTrust, Scalefusion

Programming and Scripting: Python, Bash, HTML, CSS, JavaScript, SQL
